(1) The 379293-14 stud must be used with the 352 Series PTO on the following transmissions. CH-465 (code MM4 1968 & later), GM-20, M-20 and SM-465 (GMC) (code MM4 1968 & later). Any stud used with a longer threaded end into the transmission will hit the head set gear on the countershaft of the transmission.

(2) The 379293-10 stud must be used with the 442 Series PTO on the following transmissions. CH-465 (code MM4 1968 & later), GM-20, M-20 and SM-465 (GMC) (code MM4 1968 & later). Any stud used with a longer threaded end into the transmission will hit the head set gear on the countershaft of the transmission.

(3) This stud kit is required for P.T.O.'s mounted on SPICER ESO-65-7A transmissions. The capscrew and stud length in the standard stud kit is too long and interferes with the adjacent gear outside diameter in the transmission case.

(4) The 379286-20 capscrew must be used with the 100 Series PTO on the following transmissions. CH-465 (code MM4 1968 & later), GM-20, M-20 and SM-465 (GMC) (code MM4 1968 & later). Any stud used with a longer threaded end into the transmission will hit the head set gear on the countershaft of the transmission.
